

AKSHAY MEHTA

9760768031 | mrakshaymehta007@gmail.com | linkedin.com/in/akshay-mehta | github.com/Mrakshaymehta

SUMMARY

Software engineer with internship experience at ISRO and Skypoint, plus freelance full-stack work shipping production websites and AI-agent systems. Strong in Java, Spring Boot, Node.js, Python, REST APIs, LLM/AI integration, data structures & algorithms, and system design fundamentals. Ranked top 4% in Flipkart GRID 6.0 among 500,000+ participants.

EDUCATION

RV College of Engineering

B.E. in Electrical and Electronics Engineering

Bengaluru, India

Mar 2021 – Oct 2025

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Discrete Mathematics

PROFESSIONAL EXPERIENCE

Skypoint.ai

Software Development Engineer Intern

Bengaluru, India

Mar 2026 – Present

- Contributing to a scalable healthcare compliance platform for workflow automation, audit tracking, and referral management
- Fine-tuned OCR document-extraction models using Azure Document Intelligence (Form Recognizer) on domain healthcare documents to improve field-extraction accuracy on structured and semi-structured forms
- Designed and built a multi-stage approval workflow system for compliance processes — modeling state transitions, role-based reviewers, and per-step audit trails
- Improved AI agent evaluations by building eval harnesses and test sets to catch regressions and measure output quality, driving more reliable AI integration into healthcare workflows
- Designed and implemented backend REST APIs using Node.js and FastAPI for task tracking and workflow orchestration, and built responsive React/TypeScript dashboards
- Integrated Azure and Docker for scalable, reliable deployments; optimized API performance and reduced latency through backend workflow improvements and debugging

aK Group & Company

Full-Stack Web Developer (Freelance)

Remote

Nov 2025 – Mar 2026

- **Live:** akgroupcompany.com | akeva-website.vercel.app
- Partnered with a growing business that had no online presence, taking full ownership of establishing their digital identity end-to-end — from concept and design to a live, production website
- Designed and launched two professional websites (corporate parent brand + consumer EV product brand) that gave the company a credible, modern presence to showcase products and services to clients and partners
- The new online presence strengthened the company's credibility in tenders and supported them in securing government contracts, turning the website into a real business asset
- Built lead-capture forms (dealer, contact, and product inquiry) that route enquiries directly to the team, creating a steady pipeline for new business
- Delivered a fast, mobile-friendly, SEO-optimized site discoverable on search — built with Next.js, TypeScript, and Tailwind CSS, deployed on Vercel

Indian Space Research Organisation (ISRO)

Project Intern – BLDC Motor Control Systems

Bengaluru, India

Apr 2025 – Oct 2025

- Built an end-to-end ML pipeline (data preprocessing, feature engineering, model training, evaluation) in Python using scikit-learn for torque prediction in BLDC motor control systems
- Trained a Random Forest regression model achieving RMSE of 0.31 Nm and R^2 score of 0.93, validated against IEEE benchmarks
- Designed and simulated PI/PID controllers in MATLAB/Simulink under varying load and torque conditions, reducing torque ripple and improving response time over traditional methods
- Proposed a hybrid ML-PID control architecture for real-time deployment, presented findings to domain experts

PROJECTS

- Saathi – Voice-First AI Mentor for JEE Students** | *Python, FastAPI, Claude API, Docker* Live Demo
- Built a voice-first AI mentor that opens every call from a pre-computed student briefing (recent mock trends, weak chapters, attendance, pending homework) instead of interrogating the student — the core “know-before-you-call” differentiator
 - Engineered the mentor brain as a Claude tool-calling agent with 9 function tools (context retrieval, RAG-lite knowledge base, action-item logging, follow-up scheduling, emergency flagging), with a multi-provider fallback (Claude/Gemini/OpenRouter) and a rule-based stub so every flow runs with or without an API key
 - Designed a non-negotiable, LLM-independent safety layer: a two-tier regex distress detector (English + Hindi/Hinglish) that scans every utterance and auto-fires a human-in-the-loop escalation with a verified mental-health helpline and emergency ticket
 - Implemented emotional-tone routing (MOTIVATE/SUPPORT/TEACH/PLAN/ESCALATE) and an APScheduler proactive-call engine that turns platform signals (missed classes, mock-score drops, overdue homework) into a deduplicated call queue
 - Wired a telephony boundary (Bolna + Vobiz + Sarvam STT/TTS) for Indian-language voice and automated parent-teacher (PTM) calls in the parent’s language; shipped FastAPI REST APIs, webhooks, dashboards, and a Dockerized deploy
- HireFlow – AI-Powered B2B Hiring Platform** | *Java, Spring Boot, React, MySQL, Docker, Claude API*
- Built an AI-based resume scoring engine using Claude API to match resumes with job descriptions, generating match scores and skill gap analysis
 - Developed an automated email system using JavaMail for HR workflows (rejections, interview invites, offers) with dynamic templates
 - Designed an ATS pipeline (Applied → Screened → Test → Interview → Hired/Rejected) with candidate ranking for efficient shortlisting
 - Engineered a test management system with AI-generated questions and automated evaluation of written responses with feedback
 - Implemented role-based JWT authentication and full-stack dashboards with Spring Boot, React, MySQL, and Docker deployment

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, TypeScript
Backend: Spring Boot, Node.js, FastAPI, Express.js, REST APIs
Frontend: React.js, Next.js, Tailwind CSS
Databases: MySQL, PostgreSQL, Azure Cosmos DB
Tools & Platforms: Docker, Git, Azure, Azure Document Intelligence, AWS, Vercel, Postman
Concepts: Data Structures & Algorithms, OOP, REST APIs, Microservices, System Design, AI/ML Integration, LLM Tool-Calling / AI Agents, RAG, OCR, Prompt Engineering

ACHIEVEMENTS

Flipkart GRID 6.0 – Ranked in top 4% among 500,000+ participants
